

The Open Source Enterprise Billing System.
www.jbilling.com

Installation Instructions

- 1 - [Download](#) and install Java. All you need is the Runtime Environment (JRE).
- 2 - Download jBilling and unzip jBilling. Make sure you download the **binary** package, not the source. The source has the suffix '-src'. For example, download this *jbilling-1_0_0.zip*, not this *jbilling-1_0_0-src.zip*.
- 3 - Configure jBilling: edit the file `conf/jbilling.properties`
- 4 - Startup jBilling by executing: `bin/startup.sh` on Linux or `bin/startup.bat` on Windows
- 5 - Create the first company: Point your browser to <http://localhost:8080/billing/signupEntity.do?action=setup>
- 6 - Follow the [Getting Started](#) guide.
